Laundry Presoak Emulsifier

CONCENTRATED EMULSIFIER STAIN REMOVER

DESCRIPTION:

A liquid emulsifier to be used on all classes of laundry work for the better removal of most stains.

BENEFITS:

- Highly effective on greasy, oily soils such as butter stains, salad dressings, make-up, collars/cuffs, and shop towels
- Can be added to the break operation with an alkali or used as a prespotter or prespray.
- Can be used in warm water or hot water without a loss in performance.
- Helps reduce the amount of detergent used to break up tough soils and stains.

DIRECTIONS FOR USE:

For Presoaking: Use 1 ounce per 5 gallons of water in a soak solution. Place in stained linens and allow to soak overnight.

Cuff And Collar Treating: Make up a solution of 2 ounces per quart of warm water to make up a cuff and collar pre-spray. Spray collars and cuffs in marking department. This will allow ample time to break soils prior to washing.

Washwheel Use: To provide an added boost to your break cycle, add 2-3 ounces per 100 pounds of linens in with your normal break product. This will help to loosen soils and allow for lower detergent usage. For heavier soils such as shop towels or kitchen aprons, add 3-4 ounces to the wheel with a suitable high alkaline break. Wash for 15 minutes at 150°F to get better results.

PRODUCT SPECS:

Pack size: 5 Gal., 15 Gal.
Form: Medium viscosity liquid
Solubility: Excellent
Biodegradable: Yes

Color: Blue, Clear
Scent: Pleasant
pH: Neutral
Density: 8.2 lbs/gallon
