Grease Free

NO-RINSE FLOOR CLEANER – GREAT FOR KITCHENS!

GREASE FREE is a no-rinse bio-enzymatic floor cleaner that combines micro-organisms with traditional cleaning agents to eat away the grease buildup commonly found in restaurants and food service operations. GREASE FREE is used for daily cleaning and degreasing of quarry tile or other floors without finishes or waxes.

WHAT DOES IT DO?

GREASE FREE eliminates the root cause of slippery floors: deep, packed-in grease and soil built up over time in grout and tile pores. In contrast, traditional floor cleaning methods often simply spread the grease back onto the tiles, rather than eliminating the grease, creating a uniformly slippery surface.

WHY IS IT USED?

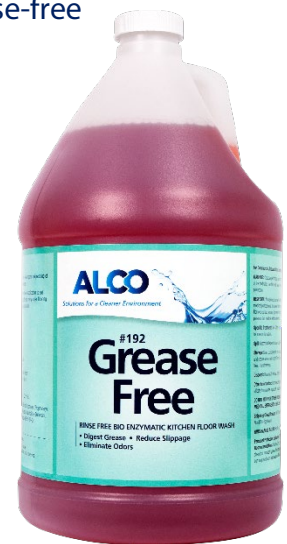

GREASE FREE's continuous action formulation works during and after application to eat away grease banks on slippery kitchen quarry tile and many other flooring surfaces. Rinse-free feature saves time, labor and water.

HOW IS IT USED?

For daily cleaning use 2 oz. per gallon.

Daily Floor Cleaning Instructions:

1. Wipe up spills and sweep floor.
2. Fill mop bucket with solution.
3. Apply GREASE FREE solution with mop.
4. Leave on floor until solution penetrates soil.
5. Brush floor with a stiff bristled brush.
6. Mop up solution with squeegee towards floor drain.
7. Do NOT rinse. Just walk away and allow to air dry.

PACKAGING:

GREASE FREE is available in closed loop gallons and 1, 5 and 55 gallon containers.
