# Hard Water Rinse

HIGHLY CONCENTRATED RINSE ADDITIVE

## DESCRIPTION:

HARD WATER RINSE is specifically designed for areas with extremely hard or high solids water and to be dispensed into the final rinse of an automatic dishwasher. Highly concentrated rinse additive and surface retention reducer produces spot-free glasses, dishes, silverware, and kitchen utensils. Wares require no toweling for HARD WATER RINSE is a rapid and efficient drying agent.

## BENEFITS:

- Eliminates all water spots and streaks
- Induces rapid and efficient drying
- Wipes out need for toweling
- Eliminates problems caused by alkaline salts in water
- Designed for all types of rinse injection units

## DIRECTIONS:

For other quick drying applications, where foam cannot be tolerated, use one teaspoon of HARD WATER RINSE AGENT in four gallons of hot water. Submerge utensils for 5-10 seconds, and then allow to air dry.

## PACKAGING:

HARD WATER RINSE is available in 4-1 gallon/cases and 5 gallon pails.
