

Nature's Plus

Buildup Remover, Grease Digester, Odor Eliminator

*I eat
grease!*

Nature's Plus digests and liquefies organic compounds including proteins, starches, cellulose, fats, oils and greases. Great for septic tank maintenance, grease traps and drains. Reduces suspended solids and eliminates foul odors, resulting in very effective odor control.

Solutions for a Cleaner Environment

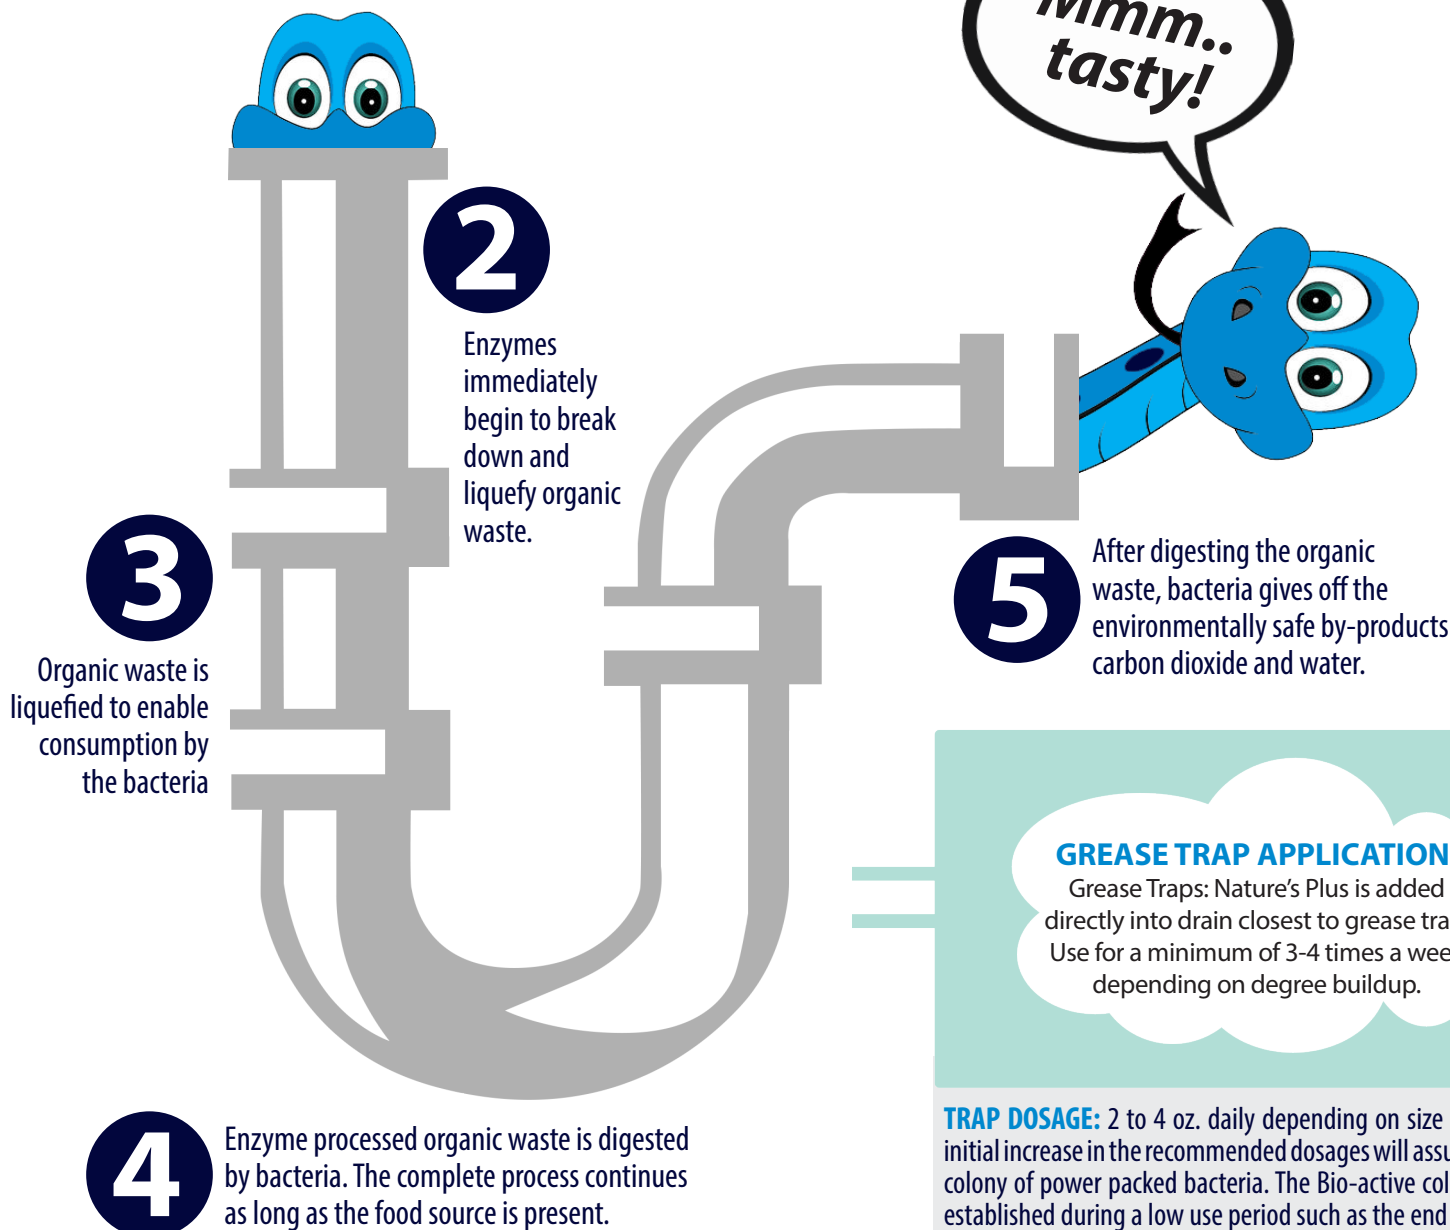

PRETREAT TODAY, SAVE TOMORROW

With today's focus on environmentally sound waste disposal and the escalating costs in kitchen grease trap maintenance, it is becoming mandatory to pretreat and eliminate organic soils before they become a hazard.

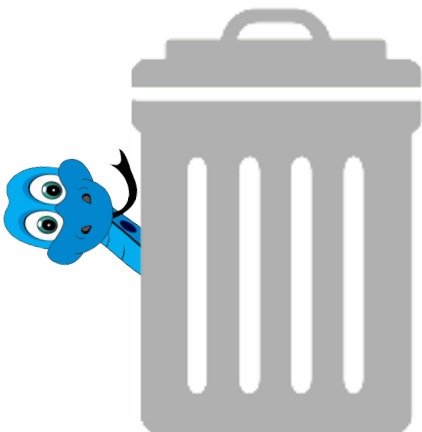

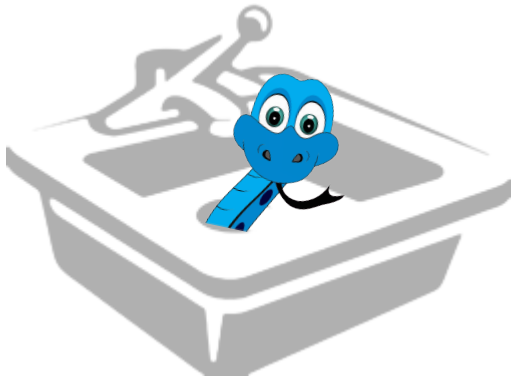

Nature's Plus formulations contain multi-strain bacteria and are more toxic, non-pathogenic, non-corrosive and certified Salmonella free.

How enzyme fortified bacteria work:

Stabilized enzymes are present in the solution, yet the bacteria continue to produce additional enzymes based on the available food source.

Grease trap and drain lines waste and odors are becoming one of the environmental issues of the 21st Century. With municipalities establishing guidelines on acceptable Biological and Chemical Oxygen Demand levels and amounts of grease entering sewer systems, businesses are now required to set up programs to reduce or eliminate the organic waste they generate. Regular use of Nature's Plus significantly improves grease trap and drain opening efficiency and dramatically reduces the frequency and cost of cleaning and pumping. Certain applications may vary with local municipalities.

ODOR CONTROL

- Nature's Plus eliminates odors from all sewer drains, from around urinals and toilets in restrooms and trash cans.
- Nature's Plus penetrates deep to destroy the source of odors, then leaves an invisible shield of enzyme producing bacteria on each surface, in every crevice, in drains and in tile grout around urinals, toilet bowls and other porous surfaces.
- Nature's Plus eliminates odors because it absorbs and destroys the organic material which is the source of most odors.
- Nature's Plus also contains special odor counteractant agents to instantly freshen the service area. These agents do not mask, they actually neutralize existing odors while the bacteria attack and destroy the source.

Nature's Plus stays behind to protect and preserve a fresh, just cleaned surface.

APPLICATIONS

For drain odor, 1-2 oz. of Nature's Plus per day added directly into lines or drains allow the bacteria to digest waste material while immediately neutralizing odors.

For all surface odors, spray Nature's Plus on full strength or turn your mop into an odor killer by adding 1-2 oz. to 4-5 gallons of mop water.

HOW NATURE'S PLUS WORKS

Bacteria thrive on organic waste matter; however, they cannot digest these materials directly. They produce enzymes to break down the matter into nutrients they can absorb.

The more bacteria in the product, the faster Nature's Plus works.

The more strains of bacteria in a product, the wider the range of enzymes which can be produced and the more different soils, stains, spots, odors and types of buildup that can be digested.

Nature's Plus bacteria are very versatile, and they can produce dozens of different enzymes to attack any material they need to consume. They have been specially selected because they generate an excess of enzymes to accelerate grease and stain removal.

When you add Nature's Plus to water in a sink, drain, mop bucket or on a spill, the bacteria start to absorb nutrients, produce more enzymes, grow and multiply quickly.

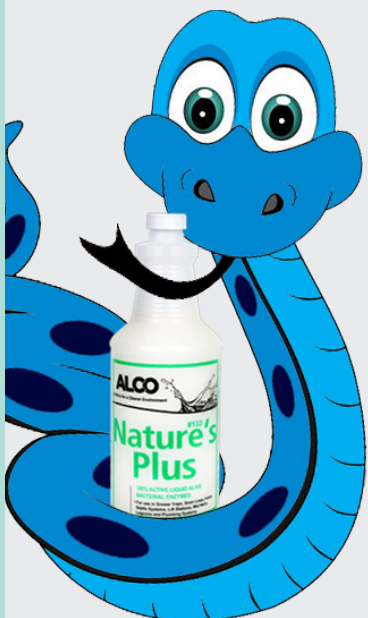

BACTERIA

These are single cell microorganisms. The bacteria in Nature's Plus are safe, non-pathogenic, and certified salmonella-free.

ENZYMES

This is a special group of chemicals which break apart organic molecules into smaller, less complex chemicals. Each type of stain or soil material requires a different type of enzyme. These enzymes continue to react and break down specific carbon chains until the source is exhausted.

Specifically generated and specially formulated, Nature's Plus is an Enzyme fortified Bio-Culture for all. It never stops working!
