## Soil Foil

### MULTI-PURPOSE NON-BUTYL DEGREASER

SOIL FOIL is a multipurpose, non-butyl cleaner and degreaser. This water-based product is yellow in color, lightly scented, with superior surfactant-based penetrants. SOIL FOIL is non-flammable and biodegradable.

#### WHAT DOES IT DO?

SOIL FOIL is a revolutionary surfactant system for superior degreasing and cleaning. SOIL FOIL loosens, lifts and suspends all types of greasy, oily soils in cold, hot, hard or soft water.

#### WHY IS IT USED?

SOIL FOIL adjusts to your need. It is non-butyl, unlike a lot of other cleaner/degreasers. It is specifically designed for fatty acid kitchen grease and can be used on any surface not harmed by water. Perfect for hand-mopping operations, wall washing, table tops and even autoscrubbers and floor machine scrubbing. This product is in a class by itself when used in eliminating animal and vegetable fats in food processing operations. SOIL FOIL also acts as a deodorant compound that kills putrefactive odors at its source.

#### HOW IS IT USED?

**DAILY MAINTENANCE:** Dilute 3 ounces per gallon of water. Suitable for fiberglass, chrome, metal, painted surfaces, glass, walls, and sinks.

**GARAGE FLOORS:** Heavy buildup of soil and grime – Dilute 16 ounces per gallon of water and apply liberally, allowing the chemical to work for at least 4 minutes.

**KITCHEN GREASE:** Walls, ceilings, and floors – Dilute 8 ounces per gallon of water. For heavy kitchen grease such as ducts, grills, and appliances – Dilute 12 ounces per gallon of water.

**GENERAL FLOOR CLEANING:** Dilute 3 ounces per gallon of water.

#### PACKAGING:

SOIL FOIL is available in 1 gallon, 5 gallon and 55 gallon containers.
