Solutions for a Cleaner Environment

DISINFECTANTS

The EPA Registration numbers 1839-83 (TB-Quat), 10324-154 (DC-7 & Wintafect) & 10324-63 (Sanni-Rinse), when used according to label directions for coronavirus, have been added to the EPA-registered disinfectant products that have qualified for use against SARS-CoV-2, the novel coronavirus that causes COVID-19.

Clean First, Disinfect Second

It is important to remove soil from a surface before disinfecting even with disinfectant/cleaners. Debris can impede disinfection results.

Dwell Time is the length of time a surface must remain wet for the disinfectant to work properly.

Ask about our other items - spray bottles, microfibers, mops etc. that go along with our disinfectant line!
