Crystal Clear

HEAVY-DUTY GREASE CUTTING FORMULA

DESCRIPTION

CRYSTAL CLEAR is ready to use and dissolves smudge, smoke films without fogging, spotting or streaking. Doesn't stain window ledges or harm squeegees.

WHERE TO USE

For windshields, windows, mirrors, glass desk and table tops, doors, showcases, ceramic tile, chrome, polished aluminum and stainless.

DIRECTIONS

Small Windows, Mirrors and Other Surfaces:

Refill into the handy Alco institutional plastic spray bottles. Spray a fine mist over entire surface, spread at once and polish dry. For best results, use two paper towels (wipe off the soil with the first and polish with the second) OR use dry, lint free cloths such as microfiber.

Change towels or cloths when dirty to avoid any re-deposits of soil. Do not use on finished wood or auto bodies. Unplug electrical appliances before using.

Large Windows, Mirrors and Glass Doors:

Pour CRYSTAL CLEAR into a bucket and clean surface with a saturated sponge or soft cloth. Wipe dry with a squeegee, clean cloth or paper towels. OUTSIDE – Hose glass surfaces to remove lightly attached soil: scrub with sponge or cloth soaked in CRYSTAL CLEAR. Wipe dry with a squeegee, clean cloth or paper towels.

PACKAGING:

CRYSTAL CLEAR is available in 12-QT/Case, 12-QT/Case With Trigger, or 4-1 gallon cases.
