## Lift Off

### COMMERCIAL CARPET DETERGENT

#### DESCRIPTION:

LIFT OFF is a yellow, mild pH, low foaming, highly concentrated product containing detergents, emulsifiers, water-soluble solvents and optical brighteners. It is made for use in steam and hot water extractor machines.

#### WHAT DOES IT DO?

LIFT OFF is a blend of detergents specifically designed to emulsify the soil in carpet or upholstery, enabling the extractor to lift it off with minimal suction. This detergent cuts through soil and grease quickly, leaving fiber brighter instantly with no residue left behind. LIFT OFF enhances the rinsing ability of plain water and will not over-wet carpet and upholstery when used according to directions. Carpet and upholstery look like new!

#### WHY IS IT USED?

LIFT OFF brightens, deodorizes, and retards re-soiling. It is low foaming and anti-static. LIFT OFF does not contain any chlorinated or flammable solvents, petroleum distillates, or harsh alkali or acids. This mildly alkaline solution deodorizes as well. It will not clog spray jets or otherwise interfere with equipment operations.

It is non-corrosive to aluminum and can be used on all synthetic fabrics. The mild pH formulation is safe for use on stain-resistant nylon carpets. High dilutions make LIFT OFF economical for use on all types of carpeting.

#### HOW IS IT USED?

Always vacuum carpet before cleaning. Only ½ oz. per gallon of water is needed to clean most carpeting. If the carpet is very soiled, 1 oz. per gallon may be used. LIFT OFF may also be used as a pre-spray, spray directly onto the carpeting, at 4 oz. per gallon of water. Introduce Alco's #173 DE-SUDZ de-foaming agent into pick-up tank and hose if excess residual suds is indicated.

#### PACKAGING:

This product is available in 1 gallon, 5 gallon and 55 gallon containers.
