

## MICROFIBER CLOTHS:

### Extending Use of a Microfiber Cloth:

SIDE 1:

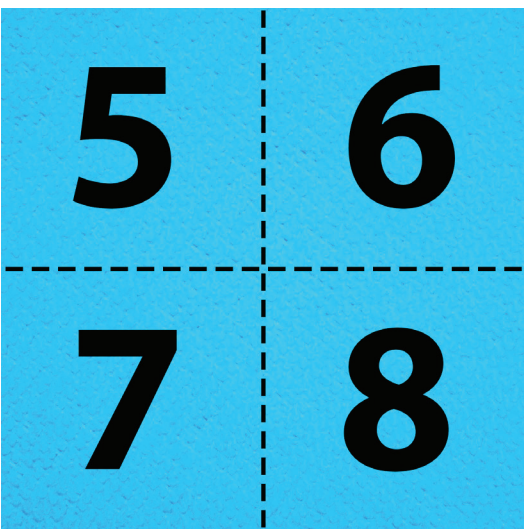

Using the whole microfiber cloth all at once or wadding it together is an inefficient way to clean and spreads germs.

#### INSTEAD FOLLOW THESE STEPS:

1. Fold the microfiber cloth in half
2. Then half again to create 4 sections on each side
3. Clean using one section at a time
4. When a section becomes soiled, change to the next section
5. Keep repeating until you have used all 8 sides or switch jobs\*

SIDE 2:

#### BENEFITS:

- Extend useful cleaning time of microfiber cloth with better results
- Continually flipping to a fresh section of towel versus wadding ensures a reduction in cross-contamination

\*You still need to change microfiber cloths between jobs.
