

Solutions for a Cleaner Environment

#0911

Rescue 911

SPOT, STAIN & ODOR REMOVER

DESCRIPTION:

RESCUE is a bio-enzymatic spot, stain & odor remover that is non-acid, non-alkaline, and non-polluting. Milky white in color with a pH of 5-6. Great environmental choice!

WHAT DOES IT DO?

RESCUE can be used on carpets and fabrics for removal of stains and odors. Also for carpet pre-spot and cleaning, laundry pre-soak and pre-spot, furniture and car upholstery spot and odor cleaner. It can be used on most surfaces or materials not harmed or stained by water. RESCUE is effective on: blood, urine, feces, cola, iodine, coffee, food stuffs, wine, vomit, smoke, mold and more.

WHY IS IT USED?

RESCUE contains a synergized blend of selectively adapted Bacillus organisms which had been chosen to emulsify organic deposits and stains such as grease, fats, proteins, starch, sugar and cellulose. The digestive process of bacteria and enzymes allow this product to eliminate stains and odors. The pleasant fragrance first neutralizes the malodor, and then the Bio-Enzymatic action of the specially selected microorganisms digest and destroy the sources of odor.

RESCUE is safe to use in any environment: hospitals, nursing homes, clinics, funeral homes, schools, correction facilities, restaurants, kennels, business offices, apartments, etc. Non-pathogenic and 100% ecologically safe.

HOW IS IT USED?

Recommended to always test carpet products on an inconspicuous spot prior to treating larger areas.

Fabric or textiles: Use RESCUE to spot clean or pre-soak soiled areas. Mix 1 pint to 1 gallon water, apply with sprayer to soak thoroughly. Keep area moist until spot or odor has been eliminated. Repeat application if necessary.

Carpets: RESCUE can be used with all types of carpet cleaning equipment. Use ½ to 1 pint RESCUE to each gallon of mixed cleaning solution to eliminate odors, and if necessary, lift carpet to spray pad. Vacuum carpet after surface has dried.

PACKAGING:

RESCUE is available in quart containers.
