

Solutions for a Cleaner Environment

SPRAY BUFFING/BURNISHING FLOORS

1. Gather equipment.

2. Use the proper pad based on the type of equipment you are using, maintenance program and type of floor.

4. Dust mop and clean the floor first to prevent scratching of the floor finish.

5. Wear appropriate shoes to avoid slipping.

6. Apply Spray Buff (liquid or gel form) in a 5'x5' area as you go. Do not let product dry.

7. Burnish the floor to a high shine, overlapping your passes.

8. Flip or change the pad as needed.

9. Properly clean and store the equipment.
