

Solutions for a Cleaner Environment

# Steps to Proper Hand Sanitizer Usage

Hand sanitizer should be used when handwashing with soap and water is not an option. It quickly reduces the number of microbes on hands in some situations, but does not eliminate all types of germs. Hand sanitizer may not be as effective when hands are visibly dirty and it does not remove harmful chemicals from hands like soap & water does. Use only according to package directions.

THIS PROCESS SHOULD TAKE AROUND **20 SECONDS**
