

Solutions for a Cleaner Environment

STRIPPING FLOOR FINISH

1. Gather equipment.

2. Dust mop the floor, making overlapping passes.

3. Tape off doorways and edges. Place 'Wet Floor' signs at all entranceways.

4. Wear proper personal protective equipment

5. Mix the stripper solution using proper dilution according to the label directions.

6. Apply the stripper solution liberally to the floor and allow 10-15 minutes dwell time.

7. Scrub small sections of the floor using clean black or high-performance pads, flipping or changing pads as needed.

8. Use a wet vacuum to pick up stripper solution. Make sure solution does not dry.

9. Damp mop rinse with clean water, changing the water frequently. Rinse a minimum of 2 times until all residue is gone.

10. Spray the baseboards with baseboard stripper. Scrub with a green hand pad. For thick build-up use a terry cloth rag.

11. Inspect floor to make sure there is no residue and scrap as necessary.

12. Apply floor finish when dry.

13. Properly clean and store all equipment.
